

perfect seals. protected product. every time.

Your seal is your reputation

Customers judge product quality in seconds. A poor vertical seal not only compromises shelf life - it can damage trust in your brand. The TNA Compliant Former Strip delivers consistent backseals across all film types and thicknesses, improving seal integrity and appearance without costly equipment changes.

Why it matters

A clean, consistent backseal ensures:

- » Better shelf appeal
- » Increased consumer confidence
- » Longer product freshness
- » Fewer recalls and complaints

With traditional Teflon strips, inconsistent contact between the seal bar and the former can result in weak, uneven seals. The Compliant Former Strip solves this.

How it works

The compliant insert eliminates any inconsistencies in the sealing contact area - enabling uniform pressure and a smoother seal along the entire back of every bag.

Designed for tna robag®

Seamlessly integrates with all tna robag® models using formers with 40mm and 50mm cages - no modifications required.

TNA Compliant Former Strip

15% discount offer

Order from TNA on or before 30 January 2026, and get a full 15% discount

Benefits at a glance

- » Extends Teflon wear strip life significantly.
- » Improves seal quality and appearance - consistent seals regardless of film type or thickness.
- » Reduces risk of leakers, contamination, and complaints.
- » Minimises product recalls. Stronger seal integrity means fewer failures
- » Reduces material waste and rework.

Smarter investment. Faster payback.

Protect your product, your brand, and your bottom line. This small insert delivers big results - better seals, longer Teflon life, and greater confidence with every bag.
