

Arcall intelli-spin[®] 100 series is an innovatively designed cantilever spray system that uses spinning disc technology to provide accurate and consistent liquid and slurry application. The Arcall intelli-spin[®] 100 fits over a production line and evenly coats the tops of food products as they travel along your conveyor system, using overlapping spinning disc spray patterns.

BENEFITS

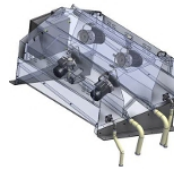

Accurate cross-band application of many fluids – water, oils, glazes, release agents, resulting in higher product and application flexibility.

Fully, self-contained design that fits on any production line, over existing conveyers – helping to reduce line downtime.

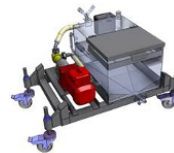

Spinning disc technology controls the application of the spray that evenly coats products as they travel down the conveyor. Suitable for medium to high application rates.

Available in modular units with easily replaceable spray heads width options available 800mm, 1000mm, 1200mm, 1500mm, 1200mm (20", 30", 40", 47", 60", 70") widths.

Low mist spray systems and negative pressure spray zones can help towards a safer and more hygienic working environment.

Easy to operate and quick to clean.

STANDARD FEATURES

- Top spray with spinning discs
- Reservoir with integral filtration

OPTIONAL FEATURES

- Slurry application – features to maintain suspension in application
- Glaze application – chilled features
- Water jacket heating

APPLICATIONS

- baked snacks
- cereals
- confectionery
- pet foods
- snacks
