

tna intelli-flav^{CLS} 5 is your ultimate slurry flavour spray system for extruded and other dry snacks. Our innovative under-surface mixing design creates a homogenous mix of slurry throughout your entire spraying process. This also means less footprint is required, using a single low-volume reservoir (50 litres/13 gal.), compared to other spray systems.

tna's own slurry-atomising air control technology ensures a consistent flavouring spray for your products, while preventing and clearing any blockages – without stopping production.

Designed for quick flavour changes, short production runs, and 24/7 production runs; the **tna intelli-flav^{CLS} 5** seamlessly integrates with our world-renowned **tna intelli-flav^{OMS} 5** and **tna intelli-flav^{MLS} 3** seasoning systems.

BENEFITS

Reduces slurry waste, with a continuous slurry process through a low volume reservoir

Uses one reservoir and takes up less floor space, compared to other models that use two reservoirs

Provides a homogeneous mix of slurry for the entire process through under-surface mixing

Delivers consistent and even slurry application onto product with atomising air-control slurry spray nozzles leading to a better quality product and requiring less tumble drum time

Prevent production stops from spray nozzles blockages due nozzles featuring auto-clearance technology

Downtime is minimised with easy-to-clean reservoir and lances

STANDARD FEATURES

- Under-surface mixing design
- Adjustable mixer speed set by the recipe
- Multiple recipe storage
- Adjustable refill rate
- Single heated double wall reservoir
- Reservoir level probe
- Powder feeder with loss in weight scale
- Liquid flow meter
- Recycle valve
- Heated slurry spray nozzles with full atomising air control
- 3 stages air filtration
- Washdown

OPTIONAL FEATURES

- 3 nozzles spray lance for **tna intelli-flav^{OMS} 5**
- 4 or 6 nozzles spray lances for **tna intelli-flav^{MLS} 3**
- auto-clearance 4/3 nozzles spray lance for **tna intelli-flav^{MLS} 3**
- Salt feeder
- Minor ingredient feeder with loss in weight
- Second oil feed, mass controlled for diverse recipes
- Bulk refill system for powder feeder

APPLICATIONS

- baked snacks
- pet foods
- snacks

SPECIFICATIONS

tna intelli-flav [®] CLS 5			
machine dimensions mm (in)	width	height	length
	1200 (47)	2400 (94)	1990 (78)
recommended slurry spray application capacity kg/hr (lbs/hr)	150 to 600 (330 to 1322) 50 to 100 per spray nozzle (110 to 220)		
powder concentration range	10% to 40% (depending upon powder specification)		
voltages & power kW (hp)	208-230V AC 3 phase or 380 – 440V AC 3 phase Neutral for power and 24V DC for control		
	max power rating 18 (24), running load 9 (12) and with heated hoses 11 (15)		
reservoir volume L (gal)	63.7 (17)		
reservoir working level volume L (gal)	min 19.1 (5) – max 50.2 (13)		
air supply pressure bar (psi)	max 4 (60)		
maximum process fluid temp °C (°F)	50 (122)		

all above specifications are subject to change and may differ according to product, please confirm when placing your order.
