

tna intelli-scan[®] 2 is your highly accurate and reliable camera system to verify the print code is complete and legible on your packaging. The **tna intelli-scan[®] 2** is capable of handling light or dark text or fine grain printing at high speeds with exposure time less than 0.5 seconds.

BENEFITS

The system finds the date code and automatically identifies each character as shown. A boundary is also defined.

Seamless and fully integrated with **tna robag[®]** software programs and easily accessed with a touch.

Fine grain image processing and high speed image detection, expose times of less than 0.5ms.

High speed image detection that amplifies its ability to find miscoded or uncoded product and activate automatic pack reject.

Flexible and suitable for a range of printed requirements that can handle light or dark text.

Highly accurate and reliable camera system to verify the print code is complete and legible.

STANDARD FEATURES

- Fully integrated software into **tna's robag[®]**
